SKU	SX-CL-4W

The candelabra bulb is the perfect replacement for the 25W halogen light typically used. This light, with a higher lumen per watt, gives the bulb a life time of over 40,000 hours. The light is dimmable and does not contain mercury. Different from traditional incandescent lights, there is no ultraviolet (UV) emitted from the 4.5W CA12 LED bulb and it is cool-to-the-touch. This light is an eco-friendly and a cost-efficient lighting option for any application using traditional candle lights. The bulb comes with dimming feature that emits a warm white, natural white, and cool light.
