

The LED Dimmable Downlight can retrofit into a 4" or 5"-6" pot light or it can be used in new construction without the pot. It can be installed into a standard junction box. This product is very economical and still provides the pot light look. The cost savings in labour and installation for new construction is dramatic. The retrofit kits for conversion of existing pot lights are sold separately for minimal cost. There is also an optional dust cover that fits inside the light once it is installed which will keep dust or insects from accumulating on the lens. This light is designed for use in damp locations either interior or exterior. It is Energy Star approved.

Optional Retrofit Kit

Dimmable Downlight – New or Retrofit	
Replaces	4" / 5" - 6"
