Certificates	
Certificates	cUL Certified
SKU	
35W with photocell	SX-TL-WMA351-02B
35W without photocell	SX-TL-WMA351-02
50W with photocell	SX-TL-WMA501-02B
50W without photocell	SX-TL-WMA501-02

LED wall pack fixtures save money on electricity and maintenance costs. Easily replace current metal halide (MH HID), high pressure sodium (HPS), or mercury vapor (MV) fixtures with these new wall packs. Not only will energy usage and electric bills be typically cut by over 50%, the area surrounding the wall packs will be brightened up, as well. New wall packs not only save energy, but have an extremely long lamp life of 50,000+ hours, which eliminates maintenance costs. They also put out a more natural white daylight type color which allows us to see better. Since they run cool there is no discoloration of the lens over time.
